

WATERLOSS technical meeting

AGENDA

Ljubljana, July 24th – July 25th 2012

The final agenda was modified due to the technical delays of the IRSTEA participants.

Tuesday: (starting at 9.00)

- Analysis of the existing development of the identification of NRW reduction measures – development of the hierarchical tree of classified measures - overview of the concepts for the DSS tool - presentation of conclusions of the Barcelona meeting and work done since that meeting.
- analysis of the feasible approaches for the DSS: Indicator - Cause - Measure - Indicator chain
- work on detailed discussion on specific NRW reduction measures, by category of measures - drafting connections, exchange of experience, information on important literature sources

end: 17.00

Wednesday: (starting at 9.00)

- Overview of the work done in the first day
- Development of the common approach for the decision tree of NRW reduction measures.
- Definition of the semi-quantitative approach towards the prioritization of measures.
- Definition of the descriptive components of the measures in the quantification of specific NRW reduction measures - time, cost/effect, by specific group of measures (measure category) and specific measure
- Drafting the programme of the task group for the August/September 2012
- Analysis of the inputs of the project partners and case cities and how to encourage them to do it and start evaluation process of the DSS with the foreseen work for the Cyprus meeting

end: at 17.00
